

Management of Complex Cardiac and Pulmonary Disorders

Archana Vatwani, PT, DPT, EdD, MBA

Faculty

Archana Vatwani is an engaging lecturer with expertise in adult acute care physical therapy, specifically cardiovascular and pulmonary PT. Her interests include Ventricular Assistive Device (VAD) patients, physical therapy management in acute care, early mobility in ICUs, effectiveness of ergonomics in graduate students, simulation-based learning, interprofessional educational learning and cultural competence in healthcare and education. Dr. Vatwani is currently an Associate professor at Nova Southeastern University (NSU) at the Physical Therapy department in Florida and is a certified lymphedema and wound care therapist (CLWT), certified diversity professional (CDP) and Project Management Professional (PMP). She served as the co-chair for the Florida Physical Therapy Association's acute care special interest group and has authored several peer-reviewed articles, abstracts, and presentations at national level conferences. She is the 2022 recipient of the National Diversity Council Healthcare Diversity Leader Award as well as the 2022 American Physical Therapy Association Minority Faculty Development Award.

About this Webinar

Treating the complex cardiovascular and pulmonary patient can be challenging. Gain knowledge on physiological monitoring, diagnostic testing, and utilization of functional and objective measures for effective clinical decision making for best patient outcomes working in an interdisciplinary team. Explore new evidence regarding best patient management of medically complex patients. Correlate the pathophysiology in common cardiovascular, pulmonary and lymphatic disorders including congestive heart failure, acute respiratory distress syndrome, post-intensive care syndrome, heart transplants, lung transplants, ventricular assistive devices and lymphedema among others to your evaluation and treatment decisions. Case analysis of complex patients will further bridge the gap between content knowledge and clinical application.

Objectives

- Apply clinical decision-making process related to the pathophysiology and differential diagnosis of heart, lung, vascular (CVP) and lymphatic disorders
- Integrate the indications of mobilizing patients in high acuity CVP patients including pre- and post-operative patients including heart and lung transplant and ventricular assistive devices
- Relate the various oxygen therapies including mechanical ventilation and patient mobilization on the different oxygen systems
- Apply safe mobilization principles including lines, tubes, ventilators, oxygen, and other adjuncts necessary for patient monitoring and treatment
- Implement psychomotor skills involved in mobilizing high acuity patients through cardiovascular, pulmonary, vascular, and lymphatic case analysis
- Utilize new evidence-based articles on best patient management of CVP medically complex patients.

Audience

This course is intended for OTs, OTAs, PTs, PTAs, SLPs, ATCs and Educators.

Help your patients achieve better outcomes.
