About this Live Webinar

This course will teach clinicians to develop interventions based on etiologies to produce successful long-term outcomes. Through an organized evaluation procedure, specific data will be used to direct the clinician to potential etiologies. Causes and appropriate intervention strategies are identified in order to utilize a systematic approach to developing an effective treatment plan. This course challenges the clinician to ask the correct questions in order to form a systematic approach to treating the child who "toe walks."

Objectives

At the end of this course, participants will be able to:

- Identify specific etiologies relevant to pediatric equinus gait
- Choose evaluation tools to determine etiology of toe walking in the pediatric population
- Apply an evidence-based treatment strategy based on etiology of a child who toe walks
- Prioritize the treatments within an individualized treatment plan for the pediatric patient, based on the needs of the child and family
- Determine the future consequences of incorrect intervention

Audience

This course is designed for Occupational Therapists, Occupational Therapy Assistants, Physical Therapists and Physical Therapist Assistants
