

Practical and Effective Strategies to Improve Self-Regulation and Executive Function

Jocelynn B. Wallach MS, OTR/L

Faculty

Jocelynn B. Wallach, MS, OTR/L, has worked as a pediatric therapist in hospitals, clinics, schools, and early intervention programs for more than 40 years. She has lectured nationwide and taught graduate courses on normal development, sensory processing disorder, self-regulation and executive functioning. For the past 25 years, she has worked in the Westwood Public Schools and maintained her private practice/owner of “Capable Hands and Associates.” She has advanced her professional development by taking graduate courses in technology.

Disclosure: Financial: Ms. Wallach receives an honorarium from ERI for teaching this workshop. Non-Financial: She has no non-financial relationships to disclose.

Course Collaborator

Nancy Williamson, M.Ed., CCC/SLP, has more than 30 years of experience specializing in pediatrics in hospital and school settings. For the past 25 years, she has been employed in the Westwood Public Schools, maintained her private practice and been an associate with “Capable Hands and Associates.” She has advanced her professional development by taking graduate course work in behavior management and technology.

Disclosure: Financial: Ms. Williamson receives an honorarium from ERI for teaching this workshop. Non-Financial: She has no non-financial relationships to disclose.

About this Live Webinar

Do you have students who have difficulty sitting still, initiating tasks, working through assignments to completion, or attending to the details of their work? Do they have difficulty applying active listening skills and memory strategies to support their learning and academic performance? This course will help you review, refresh and reframe your thinking and ability to assess and implement effective tools and strategies that address these challenges directly. This course is on the cutting edge, given the current focus on SEL (social-emotional learning). Children will need to develop calming strategies for self-regulation and executive functioning so that they can effectively interact with their peers. In addition, this course will provide strategies to improve children’s independent work habits and sustained attention and motor output to progress successfully through developmentally appropriate skills. Participants will learn low and high tech tools to facilitate the development of self-regulation, attention, organization, and memory as well as environmental accommodations and modifications.

Objectives

- Relate Ayres Theory of Sensory Integration to self-regulation and executive functioning skills.
- Relate the components of self-regulation and executive function skills to success in life and school.
- Identify the developmental progression of self-regulation and executive functioning skills.
- Choose a self-regulation strategy to support executive function for an elementary student.
- Apply practical and effective methods to facilitate sustained attention, initiation, and/or task completion in the classroom or at home.
- Modify instructional materials to allow students with self-regulation and executive function weakness to access the curriculum.

Help your patients achieve better outcomes.

Schedule – Day 1 5:40 pm - 9:00 pm EST (US)

- 5:40-6:00 Webinar Registration/Zoom Course Opens
