About this Live Webinar

This course will teach clinicians to develop interventions based on etiologies to produce successful long-term outcomes. Through an organized evaluation procedure, specific data will be used to direct the clinician to potential etiologies. Causes and appropriate intervention strategies are identified in order to utilize a systematic approach to developing an effective treatment plan. This course challenges the clinician to ask the correct questions in order to form a systematic approach to treating the child who "toe walks."

Objectives

- 1 Identify specific etiologies relevant to pediatric equinus gait
- 2 Discuss etiology-specific & age-appropriate assessment & management strategies for this population
- 3 Apply effective examination, evaluation, intervention and treatment strategies to toe walking in the pediatric population
- 4 Design an effective & individualized treatment plan for the pediatric patient
- 5 Explain the future consequences of incorrect intervention
